

HathiTrust:

Building the Organization, Building Services

Christenson, Burton-West, Chapman, Feeman, Karle-
Zenith & Wilkin

4 May 2009

Presentation structure

- Quick intro (me)
- Community-building (Heather)
- Where we go next with collaboration (me)
- Large-scale search (Tom)
- Services for users with print disabilities (Suz)
- Large-scale ingest (Jessica)
- Copyright review/CRMS (Anne)
- Q&A

Mission and Goals

- to contribute to the common good by collecting, organizing, preserving, communicating, and sharing the record of human knowledge
 - materials converted from print
 - improve access ...to meet the needs of the co-owning institutions
 - reliable and accessible electronic representations
 - coordinate shared storage strategies
 - “public good” ... free-riders.
 - simultaneously ...centralized ...open

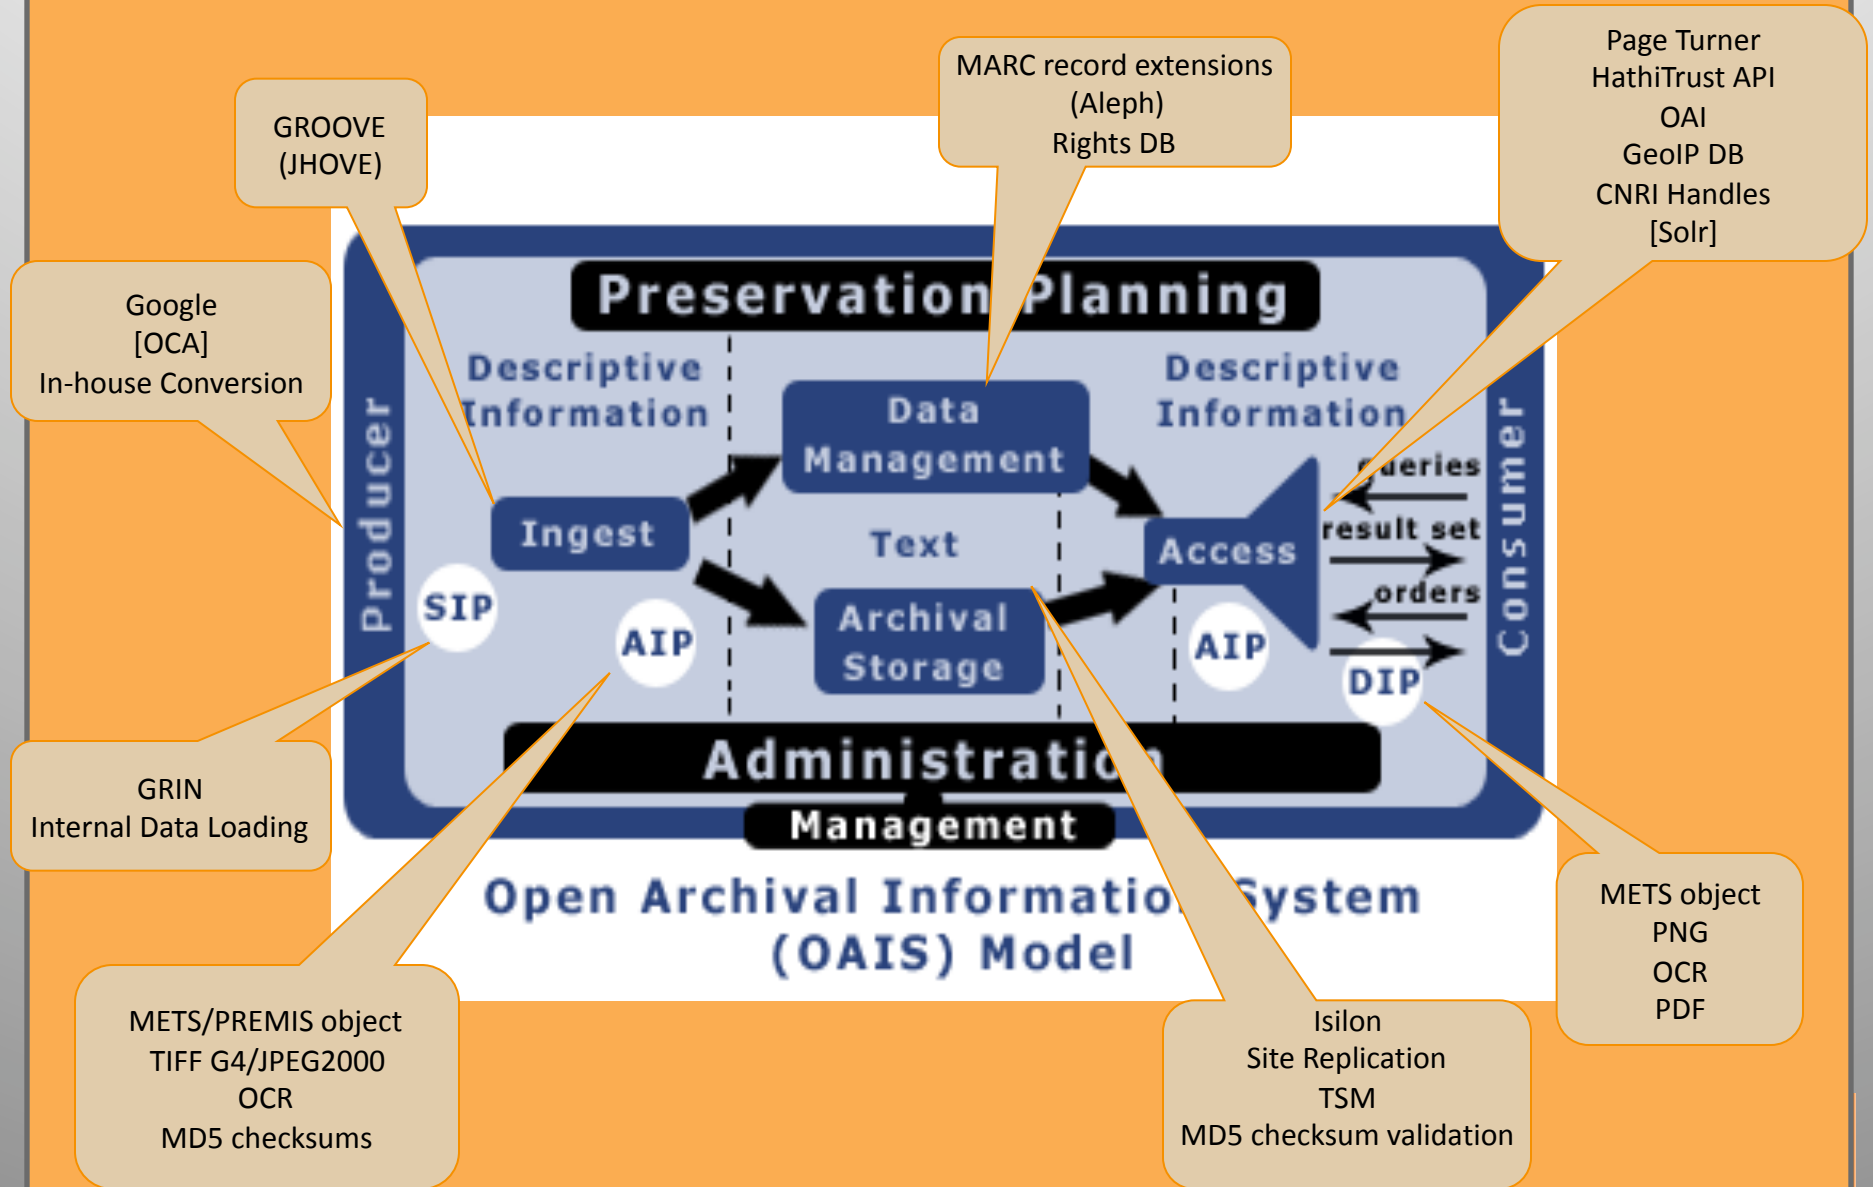

current members

- California Digital Library
- Indiana University
- Michigan State University
- Northwestern University
- The Ohio State University
- Penn State University
- Purdue University
- UC Berkeley
- UC Davis
- UC Irvine
- UCLA
- UC Merced
- UC Riverside
- UC San Diego
- UC San Francisco
- UC Santa Barbara
- UC Santa Cruz
- The University of Chicago
- University of Illinois
- University of Illinois at Chicago
- The University of Iowa
- University of Michigan
- University of Minnesota
- University of Wisconsin-Madison
- University of Virginia

Preservation: OAIS Reference Model

growth trajectory

accomplishments to date

1. 25 partners
2. successful ingest and millions of vols online
3. mirroring *and* backup
4. rich access
5. collection builder
6. soon, full text search and data API

UC's mass digitization efforts

- October 2005 to present
- 2 digitization partners, multiple sources of funding
- 10 campuses + CDL
- 7 different project locations
- CDL in coordinating role
- Over 2M volumes digitized

UC's mass-digitized content

- Open Content Alliance / Microsoft / Internet Archive /
 - Out-of-copyright works only
 - Primarily English language, some romance languages
- Google
 - In-copyright and out-of-copyright works
 - All languages

Why is UC participating in the HathiTrust?

- Build a sustainable model for services
- Provide an academic counterweight to Google
- Build a new organization based on trust & transparency
- Exploit full potential of aggregation
- Integrate HathiTrust offerings with existing UC services

UC contributions

- Deep expertise in digital preservation & discovery services
- Long experience with collaboration
- Standards, assessment, project management expertise
- Expertise & intent to pioneer ingest of Internet Archive-digitized content

The early days of collaboration

- Technical walkthrough: repository, development, ingest, services, policy
- Initial videoconference w/UM, follow up with smaller groups
- Ingest of UC Google content
- HathiTrust WorldCat Local team

UC Ingest

- File format decision TIFF G4 + JPEG2000 mix
- Requirements for ingest reporting
- UC namespace decision
- The nuances of “book packages” and bibliographic data
- Enabling the download: Google & UM & UC

The early days: challenges

- Expanding the boundaries of existing work
- Geography & travel constraints
- Communications & gaining a common understanding

The early days: what works

- Starting with what we have in common, which is a lot!
- Tapping front-line experts; minds of the best and brightest across institutions
- In the process of collaboration, participants forced to solidify their own institutional goals

Where next with collaboration?

- Begin sharing actual development, cf. ingest of Internet Archive content
 - Specifications
 - Validation routines?
 - Packaging?
- Collaboratively develop a collaborative framework
 - SAB and working group charges

Working groups?

- Security
- Collection management
- Non-Consumptive Research
- Digital preservation
- Discovery (bibliographic and full text)
- Externally-facing repository APIs
- Bibliographic metadata management
- Rights Management

HathiTrust Large Scale Search

Tom Burton-West
Information Retrieval Programmer
May 4th 2009

Challenges

- Goal: Design a system for full-text search that will scale to 7 million -20 million volumes (at a reasonable cost.)
- Challenges:
 - Must scale to 20 million full-text volumes
 - Very long documents compared to most large-scale search applications
 - Multilingual collection
 - OCR quality varies

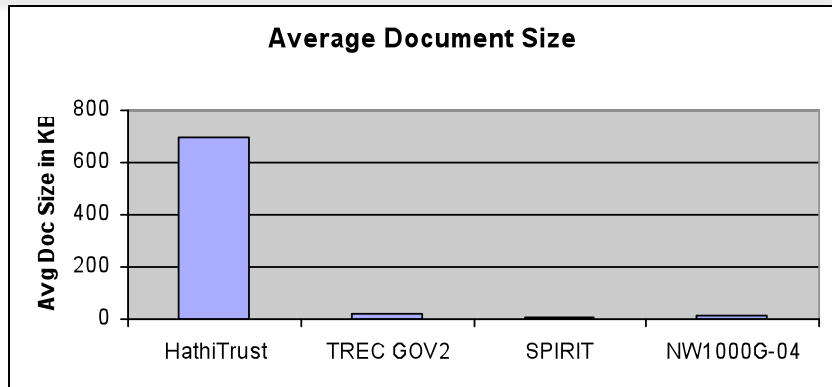

growth trajectory

Long Documents

- Average HathiTrust document is 700KB containing over 100,000 words.
 - Estimated size of 7 million Document collection is 4.5TB.
- Average HathiTrust document is about 38 times larger than the average document size of 18KB used in Large Research test collections

Collection	Size	Documents	Average Doc size
HathiTrust	4.5 TB (projected)	7 million	700 KB
TREC GOV2	0.456 TB	25 million	18 KB
SPIRIT	1 TB	94 million	10 KB
NW1000G-04	1.3 TB*	100 million	16 KB

Multilingual

- 200+ languages, 40 languages with over 1,000 volumes (some volumes in multiple languages)
- Currently all languages in one index
- Lowest common denominator tokenizing
- Some languages are challenging for Information Retrieval
 - CJK
 - Arabic
 - Vietnamese

OCR

- The OCR varies in quality
- This makes the index larger and slower
- Example: Hebrew characters not recognized

בערל כהן

148

האָט געהאַט אַ נאַטור אַרייַנצושטעקן די נאָז אומעטום און אַלע מאָל און וואָס האָט, משמעוּת, געהאַט אַ זעקסטן חוש ספּעציעל צו דערשמעקן באַהאַל־טענע יידן און פאַר וועמען מיר האָבן זיך באַזונדערס געהיט, טאַקע לויט דער עצה פון אונדזערע אַלטע. דערצו האָט דאָס געהאַט אַ געשליפּן צינגל און וואָס ער האָט נאָר באַמערקט, האָט ער גלייך צעלייגט אויף טעלערלעך און עס צעטראָגן איבערן גאַנצן דאָרף.

איצט שטייט ער פאַר אונדז, דער צוועלף־יאָריקער בנ־אַק, ווי אַן אַפֿ־געשמיסענער, אַן דעם גלאַנץ פון פריער, און מיר זאָגן צו זיך: אַט פאַר דעם חפֿץ האָבן מיר זיך דאָס געשראַקן צו באַווייזן. און ער שמייכלט אין זיך אַריין: אַהא, זיי זיינען דאָ געווען, די זשידיי (יידן), איך האָב די גאַנצע צייט געזאָגט, אַז זיי זיינען דאָ פאַראַן. אָבער מיר פּייפּן איצט אויף אים. מיר גייען ווייטער אינדזער וועג צו זוכן אונדזערע באַפרייערס.

Testing Program

- Test scalability of Solr open source search engine with HathiTrust full-text content.
 - Solr is based on the open source Lucene library
 - Solr provides a mechanism for distributed search with sharded indexes on multiple hosts for scaling the index and with replication for scaling load.
- Tested with index sizes from 100,000 volumes up to 1 million in 100,000 volume increments

Testing Program

- Tested with memory at 4, 8, 16, and 32 GB
- Tested different configurations
 - Single index single machine
 - Split index (2 shards) single machine
 - Split index (2 shards) one on each of two machines

Testing Program: Hardware

- Servers
 - 2 PowerEdge 1950 blades
 - 2 Dual Core 3.0 GHz Processors
- NFS server
 - 4 JetStor 416S Raid Arrays RAID 6
 - 7 SATA drives 7500 RPM
- Network for NFS-Servers
 - Gigabit private/unrouted network

Testing Program: Protocol

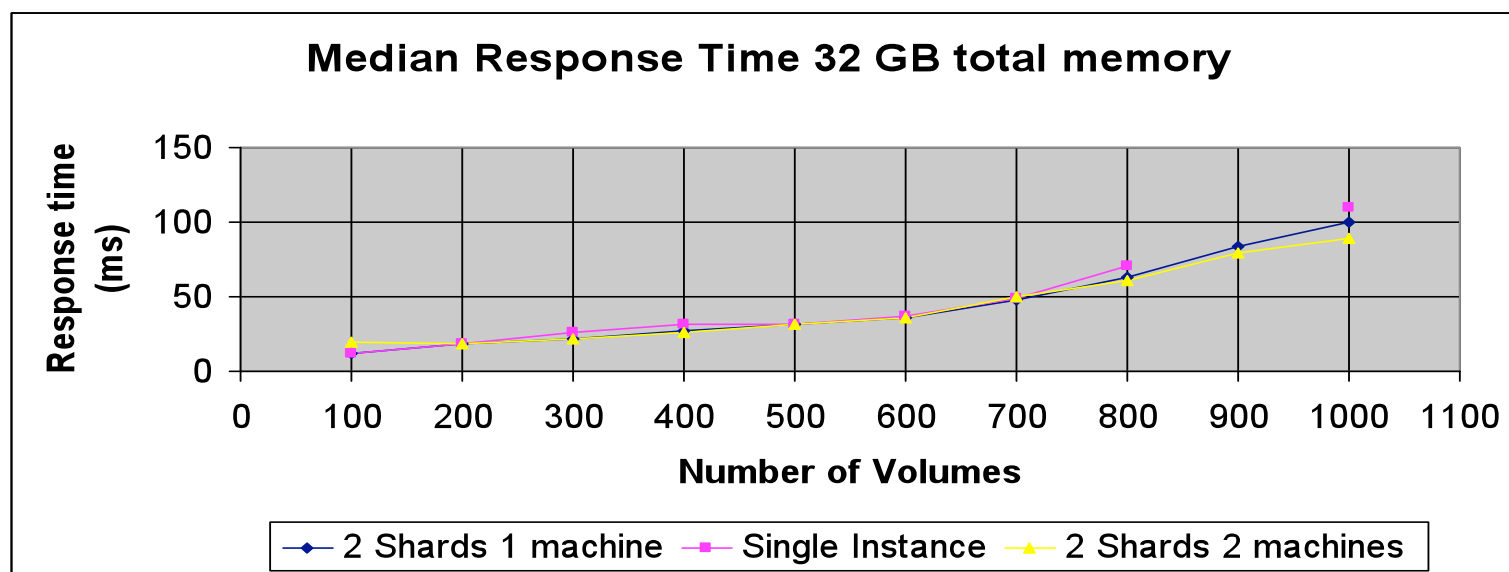

- 10,000 warm-up queries (from OPAC logs)
- 1,000 test queries (from OPAC logs)
- More details in report:
- www.hathitrust.org/technical_reports/Large-Scale-Search.pdf

Testing Program Results

Scalability and Machine Configurations

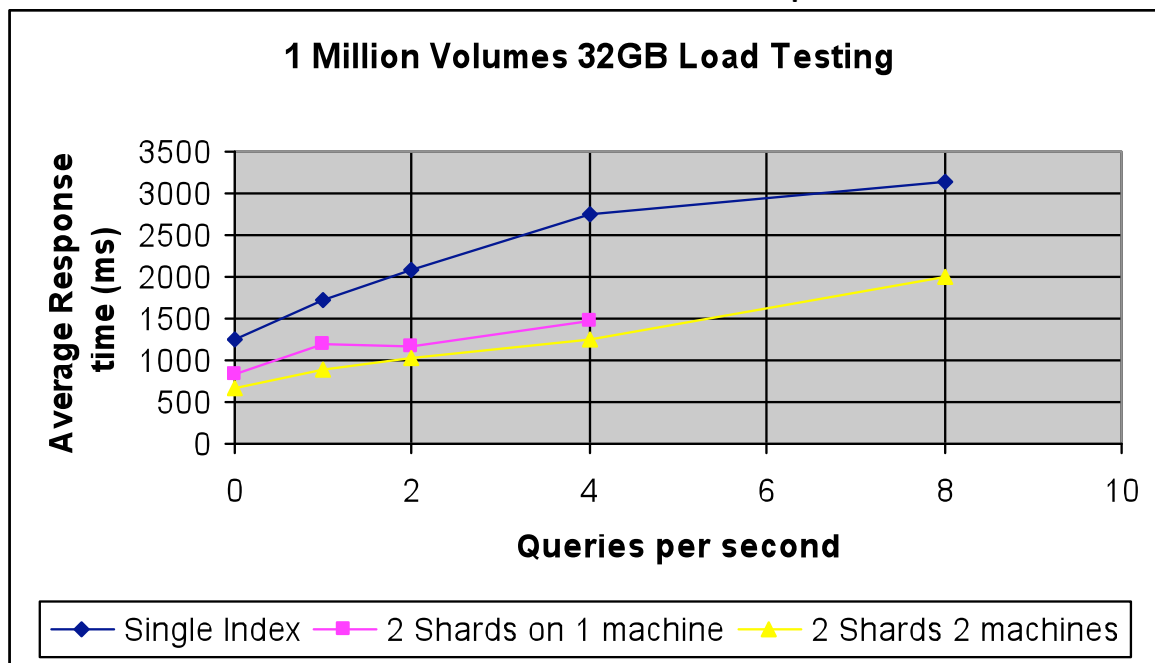

- Solr scales linearly. At 32 GB total memory there is an increase in slope above 600 thousand documents.
- Best response time was for 2 shards each on its own machine

Testing Program Results

Load testing and Machine Configurations

- Request rates over 1 query per second increased response time.
- Rates over 4 qps were not sustainable at larger index sizes.
- 2 shards on 2 machines handled load best
- Above 600 thousand documents response time increases rapidly

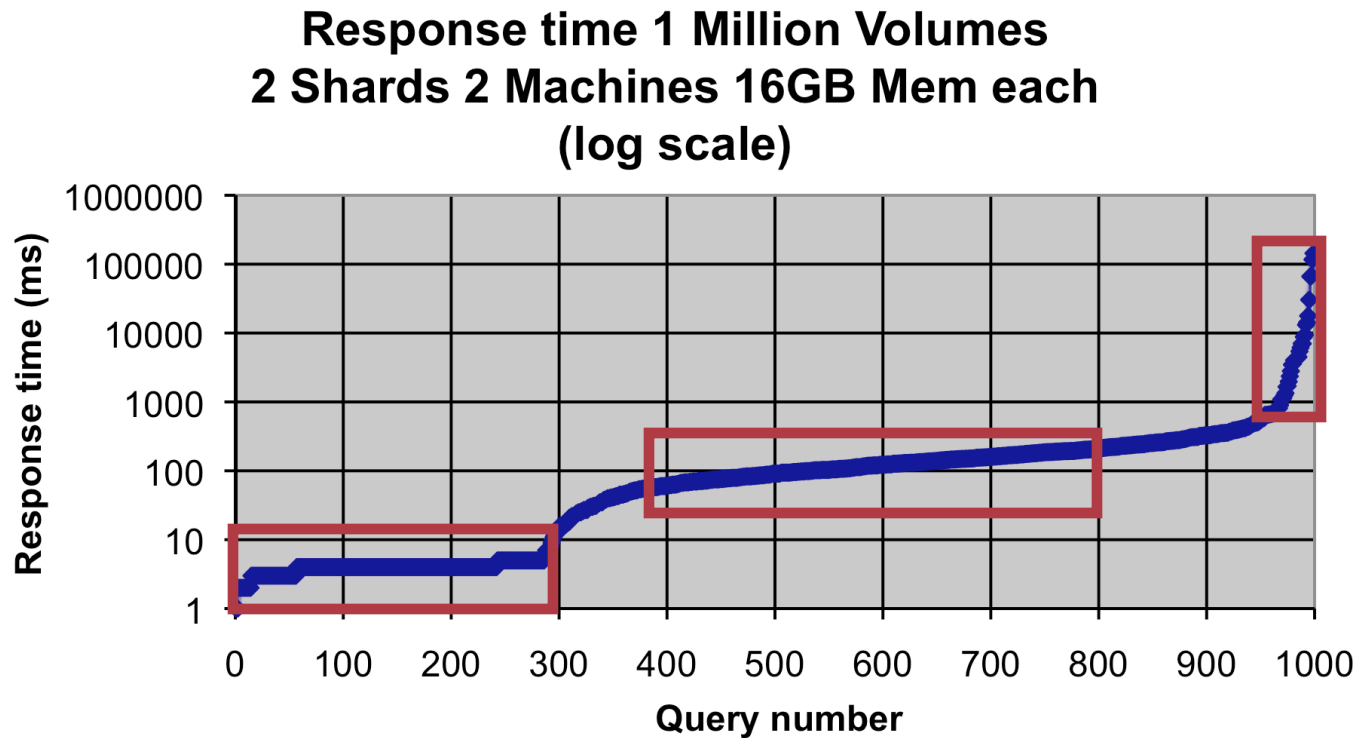

Testing Program Results

Caching and Memory

- Solr uses OS memory for caching of postings
- Memory available for caching has most impact on response time
- Based on the 1 Million volume index size of 240GB, the index for 7 million documents would be 1.6TB
- Fitting entire index in memory not feasible with terabyte size index

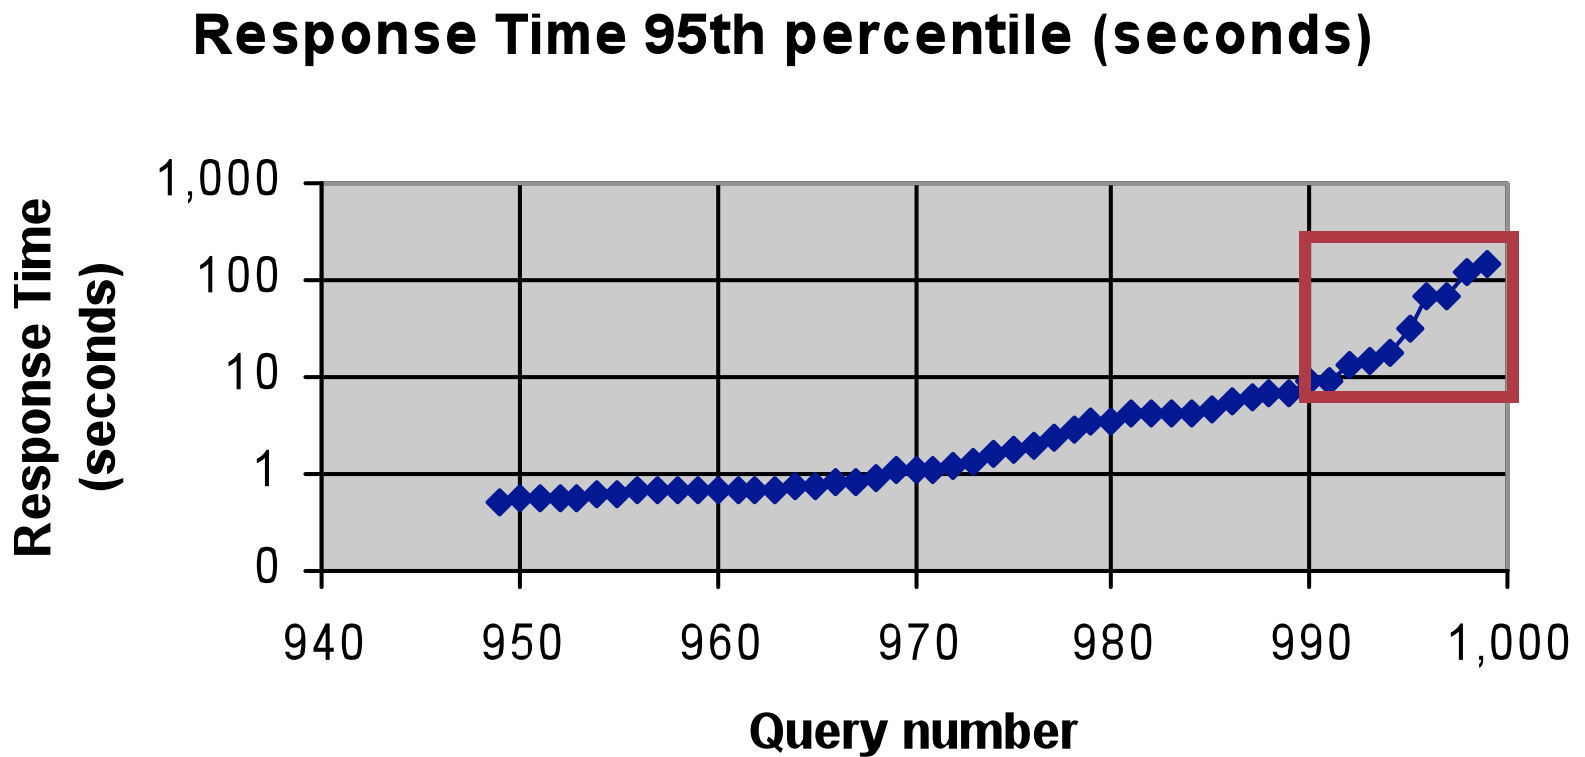

Response time varies with query

Average: 673
Median: 91
90th: 328
99th: 7,504

Slowest 5% of queries

Slow Queries

- The slowest 1% of queries took between 10 seconds and 2 minutes.
- Slowest 0.5% of queries took between 30 seconds and 2 minutes
- These queries affect response time of other queries
 - Cache pollution
 - Contention for resources
- Slowest queries are phrase queries containing common words

Slow Queries

- Slowest test query: “the lives and literature of the beat generation” took 2.5 minutes.
- Phrase query with common terms (154,000 documents must be evaluated)

Word	Number Docs	Average tf/doc
the	800,000	10,000
of	892,000	8,453
and	769,000	4,809
literature	453,000	279
generation	414,000	211
lives	432,000	124

Query processing

- Phrase queries use position index
- position index accounts for 85% of index size
- position list for common words such as “the” can be many GB in size
- This causes lots of disk I/O and also “pollutes” the cache

Query Processing: Postings List

Doc ID	Content
1	The black dog chased the white cat
2	The hungry dog ate the cat's food
3	The cat sat in the sun.
4	The dog buried a bone.

Word	Doc IDs
a	4
ate	2
black	1
bone	4
buried	4
cat	1,2,3
chased	1
dog	1,2,4

Word	Doc IDs
food	2
hungry	2
in	3
sat	3
sun	3
the	1,2,3,4
white	1

Query Processing: Position List

Doc ID	Content
1	The black dog chased the white cat 1 2 3 4 5 6 7
2	
3	
4	The dog buried a bone.

Word	(Doc ID) positions
a	(4) 4
ate	(2) 4
black	(1) 2
bone	(4) 5
buried	(4) 3
cat	(1) 7, (2) 6, (3) 2
chased	(1) 4
dog	(1) 3, (2) 3, (4) 2

Word	(Doc ID) Positionss
food	(2) 7
hungry	(2) 2
in	(3) 4
sat	(3) 3
sun	(3) 3
the	(1) 1, 5, (2) 1, 5, (3) 1, 5, (4) 1
white	(1) 6

Query Processing

- “Dog” AND “Cat”

cat	1, 2, 3
dog	1, 2, 4

“Dog” AND “Cat”

Docs: 1,2

- “The Cat” (Phrase)

the	1, 2, 3, 4
cat	1, 2, 3

“The” AND “Cat”

Docs: 1,2,3

the	(1) 1, 5, (2) 1, 5, (3) 1, 5, (4) 1
cat	(1) 7, (2) 6, (3) 2

“The Cat”

Docs: 2,3

Stop Words

- The word “the” occurs an average of 15,000 times in about 80-90% of all documents.
- Removing “stop” words (“the”, “of” etc.) not desirable
- Couldn’t search for many phrases
 - “to be or not to be”
 - “the who”
 - “man in the moon” vs. “man on the moon”

Stop Words

- Stop words in one language are content words in another language
- German stopwords “war” and “die” are content words in English
- English stopwords “is” and “by” are content words (“ice” and “village”) in Swedish

“CommonGrams”

- Bi-Grams triple index size
- Nutch and CDL XTF implement “CommonGrams”
- Create Bi-Grams for any two word sequence containing common terms
- “The rain in spain falls mainly” = “the-rain”
“rain-in” “in-spain” “falls” “mainly”

CommonGrams Example

- Slowest query: “The lives and literature of the beat generation”
 - “the-lives” “lives-and”
 - “and-literature” “literature-of”
 - “of-the” “the-beat” “generation”

CommonGrams

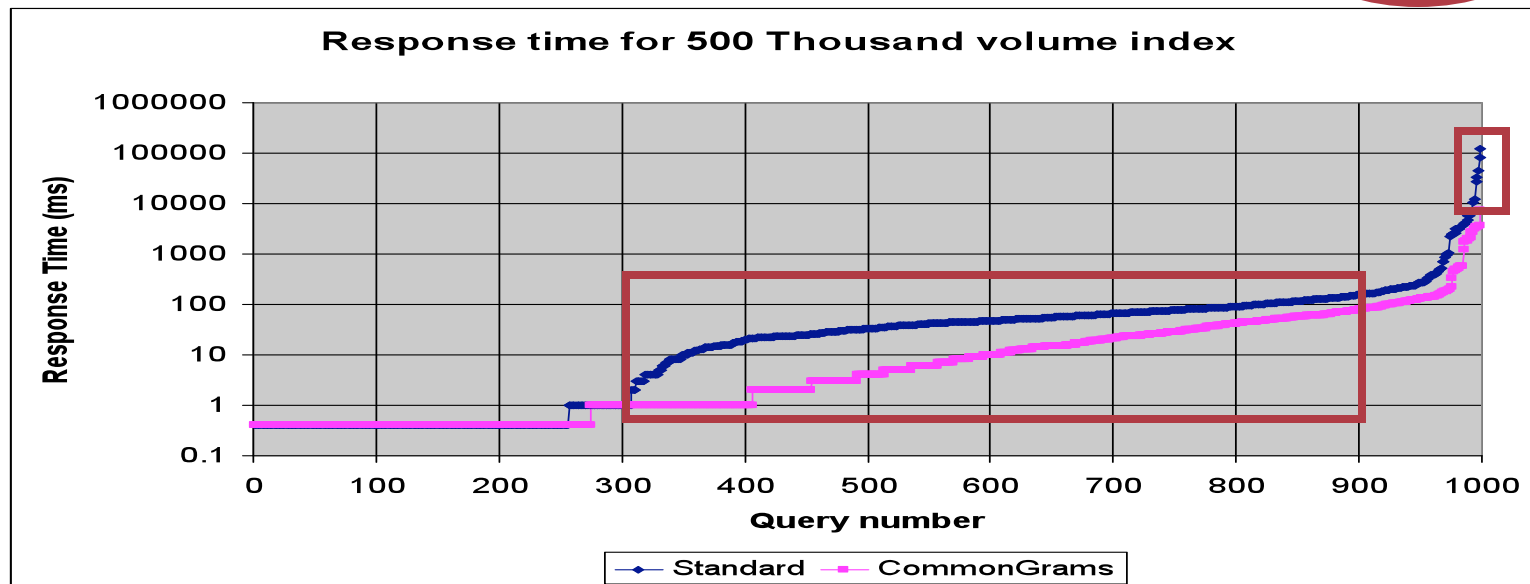

Standard Index		CommonGrams Index	
word	% of docs	word	% of docs
the	90%	the-lives	26%
lives	52%	lives-and	23%
and	86%	and-literature	15%
literature	56%	literature-of	21%
of	94%	of-the	79%
beat	34%	the-beat	5%
generation	52%	beat	34%
		generation	52%

CommonGrams

Comparison of Response time (ms)

	average	median	90th	99th	slowest query
Standard Index	459	32	146	6,784	120,595
Common Grams	68	3	71	2,226	7,800

Next Steps

- Move beta search into production
- Investigate performance with 2-8 machines
- Investigate further optimizations
- Investigate facets and fielded search
- Integrate with other HathiTrust applications such as Collection Builder

Possible Future Development

- Investigate relevance ranking
 - Boost rank for words occurring in MARC subject, author, title fields.
 - Investigate document size normalization
- Improve multilingual access and retrieval
- Investigate page level indexing and integration with book indexing

Possible Future Development

- Investigate user interface/user interaction issues
 - How best to display large result sets
 - How can users best narrow their search?
 - Integration with user's tasks

“Search” URLs

- beta Search <http://babel.hathitrust.org/cgi/l>s

Text-only Interface & Accessibility

Suzanne Chapman

Interface & User Testing Specialist

suzchap@umich.edu

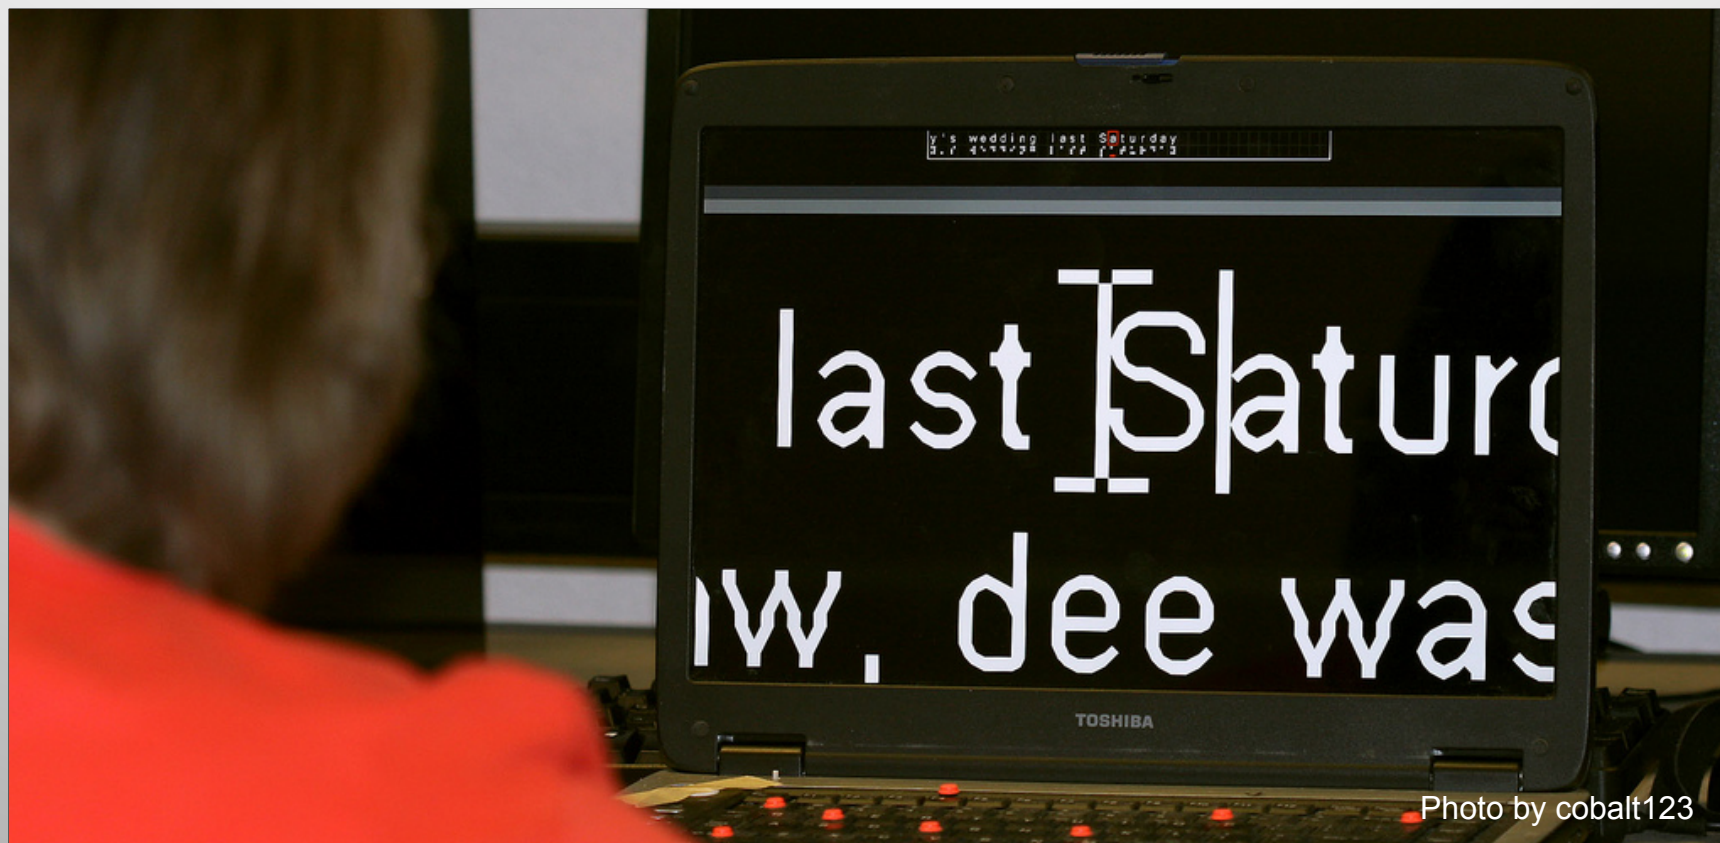

Photo by cobalt123

A system & interface designed specifically to provide access to all digitized materials (regardless of copyright) for our users with print disabilities: low-vision to no vision, learning disabilities

www.hathitrust.org

From a SXSWi Web Design Confession Booth:

I don't always care
about accessibility.

Copyright

Explicitly allowed under section 121 of U.S.
Copyright law - Limitations on exclusive rights:
reproduction for blind or other people with
disabilities

“...it is not an infringement of copyright for an authorized entity to reproduce or to distribute copies or phonorecords of a previously published, nondramatic literary work if such copies or phonorecords are reproduced or distributed in specialized formats exclusively for use by blind or other persons with disabilities...”

<http://www.copyright.gov/title17/92chap1.html#121>

UM Services for Students with Disabilities (SSwD)

Precedent for offering this type of service set by SSwD and their book digitization/OCR service to UM students with disabilities upon request.

Process

- Consulting with UM's SSwD
- Understanding assistive technology
- Coding techniques (w/ SI intern Anran Ye)
 - Evaluation & validation tools
 - Standards based code
 - Wrote set of guidelines
- Programming: Kathleen Ludewig, Phil Farber, Tim Prettyman
- Usability & Feedback (w/ SI intern Jennifer Tatomir)

Braille Based Computers

Braille Sense computer with refreshable Braille display & audio voice

Photo by JRandomF

What we've done

1. Made standard interfaces more accessible
2. Created a text-only interface that is optimized for the specific needs of users with print disabilities
3. Created a system to grant additional access to the full-text of a digitized book for certain UM patrons, regardless of the book's copyright status

How it works

1. UM patron registers with the Services for Students with Disabilities office
2. Library is notified to set a status on patron's account
3. Patron checks out any book (manually or via service) that has been digitized
4. Patron receives automated email from Library catalog system containing link to text-only interface
5. Prompted to login (checks to verify patron has book checked out and is part of the program)
6. Patron has access as long as the book is checked out to their account.

Standard Pageturner (text view)

The screenshot displays the HathiTrust Digital Library interface. At the top, the HathiTrust logo is on the left, and navigation links (Login, About, Help, Feedback) and a search prompt are on the right. Below this is a dark navigation bar with links to Catalog Search, Public Collections, My Collections, and Getting Started. A search bar contains the text 'Ancient man; the beginning of civilizations, by Hendrik Willem ...' and a 'go' button. On the left side, there is a sidebar with a 'Login' section, a 'HathiTrust Record' section, and a 'Contents' table of contents. The main content area displays the text of the document, which is a chapter titled 'THE WORLD GROWS COLD'.

THE WORLD GROWS COLD
SOMETHING was the matter with the weather.
Early man did not know what "time" meant.
He kept no records of birthdays and wedding-anniversaries or the hour of death. He had no idea of days or weeks or years. When the sun arose in the morning he did not say "Behold another day." He said "It is Light" and he used the rays of the early sun to gather food for his family. When it grew dark, he returned to his wife and children, gave them part of the day's catch (some berries and a few birds), stuffed himself full with raw meat and went to sleep. In a very general way he kept track of the seasons. Long experience had taught him that the cold Winter was invariably followed by the mild Spring—that Spring grew into the hot Summer when fruits ripened and the wild ears of corn were ready to be plucked

Increasing Access – Copyright Review Work

US works published 1923 through 1963 could be in the public domain if:

- they were published without a proper copyright notice on the piece (copyright/©+date)
- they were published with notice but the copyright was not renewed (after 28 years)

Increasing Access – Copyright Review Work

- Beginning in early 2007, started copyright review work in Technical Services Division
- Work spread over 5 staff members in Electronic Access Unit
- Adds up to approximately 1.5 FTE

Increasing Access – Copyright Review Work

- To check for copyright notice:
staff have special authorization to access in-
copyright works in HathiTrust via the
pageturner

R462860	The last tycoon. Edmund Wilson, foreword. (With The great Gatsby & Selected stories) NM: foreword & The last tycoon	FITZGERALD, F. SCOTT	A158462	Long record

Copyright Review Work Results

Review Stats:

- Total time spent (since 2007): 2,569 hrs
- Ave. hrs per month: 77
- Ave. number of items reviewed per month: 3300
- Ave. time spent per review: 84 secs

Review Stats:

As of May 1, 2009:

- over 57,000 volumes reviewed
- approx 34,000 volumes opened up/
now available as full-text

Issues w/copyright review

- Reliability of determinations
 - Stanford db (proving a negative)
 - complexities (many use cases)
 - human error
- Consistency – ditto
- Time - amount reported does not include admin time
- Data Management - spreadsheets (lots & lots!)

IMLS National Leadership Grant

Submitted proposal to build a
Copyright Review Management
("CRMS")

- more efficient system for managing copyright determinations work
- prioritization and workflow management
- tools to facilitate determination
- “double blind” checking to ensure reliability
- point of collaboration with other institutions

IMLS National Leadership Grant

Three years starting 12/1/08:

- Defined requirements/developed beta - 12/08-1/09
- Beta version up and running; EA Unit tests and provides feedback - 2/09
- Started Usability testing - 2/09

Programmer leaves to run family lumber company – 3/09

Pole Barns

Santelli Lumber is more than just a lumber company...
Santelli Lumber is dedicated to providing Contractors and
Do-It-Yourselfers with a broad range of lumber, building

IMLS National Leadership Grant

- Interim Programmer assigned; work continues - 3/09
- Currently integrating results of usability testing; refining design and functionality before final testing and tweaking
- Plan to have CRMS version 1.0 in production by end of 5/09
- Cease manual review by 6/09

IMLS National Leadership Grant

Further out:

- Share results (e.g., OCLC Copyright Evidence Registry; OAI feed of determinations) – by fall 2009
- Copyright Office searches/compare results – Spring 2010
- Release version 2.0 by June 2010
- Train and bring on at least 3 other institutions by Fall 2010 (Indiana, Minnesota, Wisconsin)
